Surface d=3 – Steane: hardware-only local-order test
3 ideal preparation rounds; physical p=0.001; unchanged adapter geometry and Bell order
Bell fidelity 1
Bell fidelity 0.999
Legacy XX (unchanged, reused)
Legacy ZZ: local X then Z
New ZZ: local Z then X
Adapter LER (%) — 95% Wilson intervals
10^{0}
10^{-1}

Adapter syndrome rounds
Only ZZ merged local-family order changes. XX data are reused, not resampled.
Pointwise intervals; zero failures shown as upper limits. Legacy error-capped counts make nominal tests approximate.
